

## CO- AR-924

# DEEP SEARCH METAL DETECTOR

### Specification:

- Underground Metal/Metal mineral Exploration.
- Detection - Ferrous, Non-Ferrous & Alloys
- Manual Adjustment to eliminate mineralization reaction
- Battery low Power indications
- Maximum Depth: 1 mtr.-1.5 mtr.
- Detection Method: Balance Detection/identification Detection
- Sound Frequency: 400 Hz.
- Audible Speaker Devices
- Power: DC-12V
- Can be use in archaeology perspective Military applications, detection of raw material, fuel food metal debris, Ground hidden treasures, inspection of underground pipes, cables etc.
